Edit Maladies

Maladies can take many forms. They may be sicknesses, accidents, or even damage to property. They are bills that students may become responsible for.

Maladies

Edit Maladies

Names should describe the malady.

Ex: Flat Tire

Edit Maladies

The **Cost** is how much this malady costs the student before insurance kicks in. Do not use the "\$" symbol.

Edit Maladies

The **Probability** is not a true percent. Rather it is a rough idea of how much more likely an event is to occur.

Larger numbers means that it is more likely to happen, while smaller numbers means that it is less likely to happen. For this reason, give the expensive maladies a lower number, and thereby a smaller likelihood of occurrence.

Example: I could give a \$5,000 auto accident a Probability of 5, while I might give a Safe Driver a Probability of 100.

You do not have to enter a **description**.
But if you want to give a little more
information about the malady, this is
the place to do it.

The **Insurance Type** is what you set up previously. It tells which insurance covers this particular malady.

Ex: A flat tire would be covered by Auto Insurance, not Medical Insurance.
